

Abstergo Memo #5288444

Topic: Epsilon Third Mission - Halloween Special

Dated: Saturday, October 25 of 2014

Classification: Mission Briefing | Security Clearance Level 3

Selected Participants: Epsilon Squad | Phi Squad | Gamma Squad

Mission Supervisor: Otto Schmidt | Future Technologies Division

Mission Briefing: **PROPERTY OF ABSTERGO.ORG!**

We have received a very important request for assistance from an old associate of ours, M Corporation. They are a charitable organization that reopened an Asylum in 2009 for brain development research. We received a message from one of the Chief Scientists over there, Dr. R, around two days ago indicating that their underground lab was going out of control due to one of their test subjects losing control and turning into a phantom-like figure. We have dispatched three military teams and until now we have no reply from them. However, we were able to receive a video feed from one of the soldiers showing the decontamination chamber filled with blood alongside many sliced up corpses and the feed ends with the soldier being impaled from behind while watching his commanding officer being lifted up in the air by an invisible force and blowing up to many pieces.

M Corporation has programmed the self destruction of their entire facility alongside the asylum above it eight days after the sending of a rescue message; receiving this message also means that Dr. R is no longer alive, or at best presumed to be deceased. Dr. Warren Vidic always found his methods questionable since they used an asylum as a pool of lab rats, Vidic always preferred to have sane testing subjects.

Epsilon, Phi and Gamma teams, you have until Friday, October 31st 2014 midnight to complete this assignment. I know that this assignment is not what would normally come by but it is a mission nevertheless.

Your Objectives:

Primary

- Dispose of all of the unstable test subjects you find.
- Secure the underground facility.
- Get rid of the phantom creatures.
- Lock down the facility.
- Lock down the labs.
- Lock down the asylum. **PROPERTY OF ABSTERGO.ORG**
- Retrieve all survivors.

Secondary

- They have been doing research on cognitive and neurological abilities of humans for around five years now, it would be a waste to lose that research. Find a way to the secured server vaults and send all the data you can possibly find to our secure servers. This may help us in the future to defend against anymore of ERUDITO's Martyr creations.
- It seems that one of the labs, Lab 342, is sending of a beacon signal. If you can find it perhaps it would be worth investigating; be sure to shut down the beacon as well when you find it.

Tertiary

- Try to locate the remains of our military teams and confirm their situation. They should be a total of 16 members. If possible, bag their bodies and extract them, if not possible, try to at least retrieve their tags and IDs. They are our men and women and deserve to return home for a proper funeral.
- If it is possible, try to secure as many bodies as possible in order to give them proper treatment as well.

Entry and Evacuation:

You will be dropped off and picked up via helicopter. We already have the outer perimeters secure and armed forces mobilized.

Equipment:

- Usual High-tech Abstergo Gear.
- FTD's Prototype Dimensional Shield.
- Gas masks.
- FTD's Electronic Nose Device. **PROPERTY OF ABSTERGO.ORG**
- Signal Beacon.
- Long Range Communication Devices.
- Multi-platform Scrambling Devices.
- Medical Bags.
- Ammunition Bags.
- Infrared/Thermal/Night Vision Goggles.
- Blueprints of the Asylum.
- Ectoplasmic Energy Polarizer Pack (Beware, FTD Prototype)

Good luck teams, we are all counting on you.
